AR15 AR15 ADJUSTABLE BUTTPLATE

HIGH-
PERFORMANCE
PRODUCTS
engineered
by 11-time
National
High Power
Champion
David Tubb

This product allows installation of the Tubb 4-Way Adjustable Buttplate onto an AR15.

For years, the Tubb 4-Way Adjustable Buttplate has been considered the very best available for conventionally stocked rifles. The development of a base mounting plate that fits the standard AR15 A2 (or A1) buttstock allows this part to be easily integrated into your AR15.

This buttplate features length, rotation, height, and cast (offset) adjustment capabilities. We made the mounting plate as thin as possible to avoid adding unnecessary length to the stock. (Installation onto an older-style A1 buttstock shell will net a 5/8 inch shorter length than an A2.)

FITTING REQUIRED! The buttpad must be trimmed to the contour of the new plate. Photos show a trimmed pad.

AR15 ADJUSTABLE BUTTPLATE —
RETAIL \$135.95 [COMPLETE ASSBY.]
MOUNTING PLATE ALONE \$49.95

The mechanism itself can interchange with another rifle equipped with a Tubb mounting plate, including that of a conventionally stocked bolt gun.
